**Size It Up**

**10**

**What's going  
to give?**

**11**

**What's it going to  
take?**

# 01 Why are we here?

- ☐ Help facilities manager to make better decisions
- ☐ Optimise maintenance and operations for facilities
- ☐ Provide insights on how to reduce facilities expenses
- ☐ Improve efficiency and performance of facilities

# 02 Elevator Pitch

**FOR**

The NP EES Office

**WHO**

Wants to optimise facilities maintenance and operations to reduce cost and improve overall performance

**THE**

Project

**IS A**

Combination of visuals from various tools such as Power BI and Alteryx Designer

**THAT**

Helps draw insight to help our stakeholders make better data-driven decisions

**UNLIKE**

Most visual implementations that do not provide key insights for better decision making

**OUR PROJECT**

Will produce user-friendly dashboards, provide key insights, and trends to satisfy our stakeholder's needs

## 03 Product Box

### InsightFlow

Get Insights That Matter

Providing clean  
dashboards for NP EES  
Office.

7

dashboards made for  
each facility.

4

sprints will be done to  
achieve our product.

#### Benefit 1:

Optimise maintenance and improve  
efficiency and performance of facilities.

#### Benefit 2:

Help drive better data-driven decision  
making.

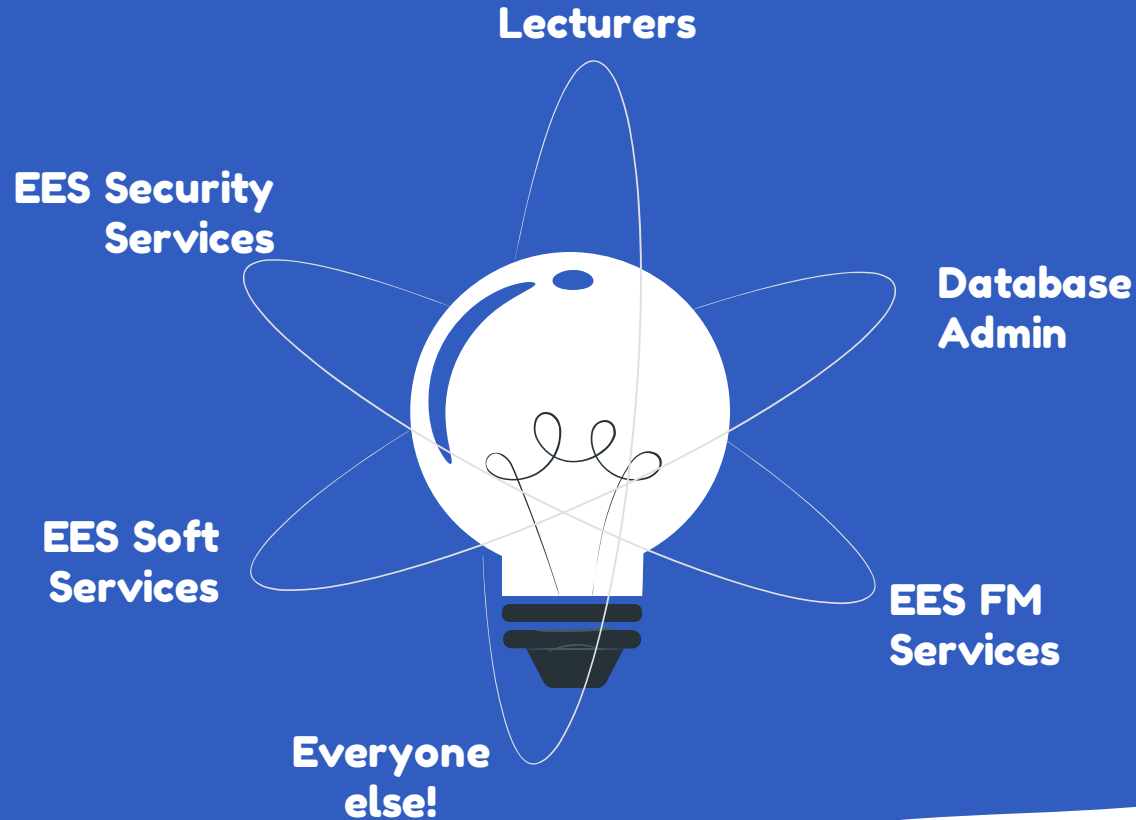

#### Benefit 3:

Provide insight on how to increase  
savings.

## 04 Not list

IN	OUT
Interactive dashboards	Website
Predictive analysis using visuals	Application
Key trends/interesting findings	Cramped information
Suggestions to reduce operational costs & improve overall performance	Too many numbers
UNRESOLVED	
Chatbot function	
Multi-language system	

# 05 Meet the Neighbours

# 06a Platforms Utilised

## Communication

## Planning

## Research

## Dataset Cleaning

## Web API

## Visualisations

## Dataset Storing

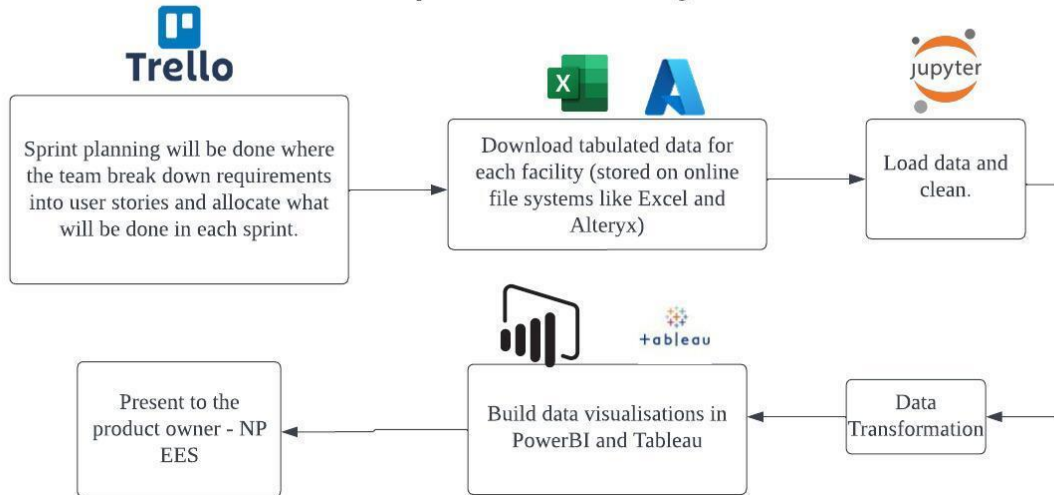

## Documentation

# 06b Our Solution

A total of 4 sprints will be held to achieve our product. Each sprint is held for 2 weeks. After each sprint, sprint reviews and retrospective meetings will be organized at the end of each sprint to reflect on what was done well, what could be improved and what will be changed.

# 07 What Keeps Us Up At Night?

- Difficulties faced during the cleaning of datasets
- Not fully understanding the objectives
- Balancing work with other assignments
- Mistakes throughout the assignment
- The pressure of 8 credit units

## 08 The A-Team

#	Roles	Competencies/Expectations
1	<b>Scrum Master</b>	Ensuring that the team understands the goal and is heading towards the right direction
2	<b>Programmers</b>	Use Jupyter Notebook and Alteryx Designer to clean the datasets
3	<b>Data Analysts</b>	Collect the cleaned datasets and create visualisations for our stakeholders using Power BI
4	<b>Product owner</b>	Ensures that the team understands the project goals and scope

# 09 Size It Up

## Sprint 1 (Wk 3 - 4)

Cleaning of sample datasets

## Sprint 3 (Wk 11 - 12)

Cleaning of actual datasets

## Final Assessment (Wk 17 - 18)

Project presentation

## Sprint 2 (Wk 5 - 7)

Creation of dashboards and prototyping for sample data for interim assessment

## Sprint 4 (Wk 13 - 16)

Creation of dashboards and final solution for actual data

# 10 What's going to give?

**11 What's It  
going to  
take**

**5 people**

**3.5 Months**

**\$25,000**

# THANK YOU!
